

Social Determinants of Health

Training Agenda

Description:

Attendees will gain clinical and practical knowledge on social determinants of health, the impact these determinants have on health disparities and inequity and strategies to address social determinants of health, health disparities, and inequity in the lives of those they serve.

Targeted Audience and Practice Level:

This training may be used for behavioral health and physical health providers including long term care providers. This is appropriate for licensed and unlicensed PH and BH professionals.

Training Objectives:

- Define social determinants of health and list 3 examples
- Complete at least one activity to gain insight about the impact of social determinants of health (SDOH), health disparities, and inequity
- List at least two possible health disparities and discuss how SDOH may lead to health disparities
- Identify at least one component of health equity
- Gain at least one strategy or resource to address SDOH in an attempt to reduce health disparities

Course Outline: (Add breaks and other items as scheduled including lunch)

- Sign in and Welcome
- Pretest
- Course Content
- Live face to face presentation. Course objectives will be accomplished as listed above.
- Post Test
- Sign Out and Thank You
