

Key Takeaways

As you reflect on your role in a healthcare team environment and the lessons of this course, download this worksheet to use to dive into key takeaways for continued learning.

1. Explain the pathophysiology of pain in sickle cell disease and how it impacts patients' daily functioning and overall well-being
2. Differentiate between acute and chronic pain presentations in patients with sickle cell disease
3. Identify evidence-based pharmacologic and non-pharmacologic strategies for pain management that prioritize patient safety, preferences, and shared decision-making
4. Apply clinical guidelines to support individualized, team-based pain management across the lifespan

Reflection

What barrier(s) in my healthcare team environment currently exist on this topic?

How can I apply this information as a member of the healthcare team to improve quality of care or health outcomes?

LEARNING FROM, WITH, AND ABOUT EACH OTHER

I will share the information learned from this course with my healthcare team by:
