

Ethics Experienced: Case Examples in Mental Health Settings

PROGRAM GOAL

This course provides research on common ethical challenges for mental health professionals and reviews the benefits of ethical decision-making models. Participants will practice applying ethical decision-making steps to case studies. Case studies include legal cases which allow learners to experience the real outcomes of the decisions other professionals have made. Use of ethical principles and virtues-based decision-making is explained with emphasis how challenges personal beliefs which may create ethical conflicts in professional settings.

LEARNING OUTCOMES

At the close of this activity, participants will be able to:

- Recognize the importance of the use of ethical decision-making models as an essential component of effective case management and healthcare team practice
- Apply ethical codes, ethical principles, and virtues-based ethics to positively impact the delivery of ethical case management and healthcare team interventions
- Identify how ethical bracketing can positively affect ethical decision-making related to patient care

TARGET AUDIENCE

- Nurses
- Case Managers
- Social Workers

SPEAKER BIOGRAPHICAL INFORMATION

Brianne Eddinger, LCSW, LISW-CP

Brianne Eddinger, LCSW, LISW-CP, is a Behavioral Health Clinical Trainer on the PHCO Learning & Development Team and has worked for Centene since 2017. She received a master's degree in social work from the University of South Florida in Tampa, Florida. She is a Licensed Clinical Social Worker and holds professional licenses in Florida, Georgia, South Carolina, and North Carolina. Brianne has worked in various clinical settings including crisis stabilization, inpatient psychiatry, medical hospital, medical case management, community mental health and university counseling center. She is trained in cognitive-behavioral therapy (CBT), trauma-focused assessment and interventions, solution-focused therapy, and strengths-based, person-centered frameworks.
